

ADANAC OVERPASS CLOSURE!

First Avenue is open and construction is complete but Adanac still remains closed. They have now extended the closure of Adanac until December 31, 2018. It was supposed to re-open Aug. 31st.

Many of us were under the impression that the overpass would be opening up this month September of 2018. However it seems like the overpass is still closed resulting in many people having to take Hastings Street which is very busy.

By delaying the opening of the overpass the City perhaps hopes that the public will forget about the situation and just shrug it off and "get used to it". Unfortunately people are sick and tired of being pushed around by City officials who always seem to have an agenda of trying to get people out of their cars etc.

We are not able to use the overpass at this time even though it was created with taxpayer money...

The more people complain, the more the city will realize that they cannot just close an overpass and leave it closed indefinitely just because they work for the city and can do whatever they want.

We have a voice that wants to be heard and we want to be able to use the roads and overpasses that we need to use in our own communities that we PAID FOR.

Together, I believe that we can get the Adanac overpass open for all of us to use once again.

The email to file the complaint to the city is: adanac@vancouver.ca
